LIMITED-TIME OFFER FOR

## Industrial Designers

### SAVE 40%

## on Pro/ENGINEER Interactive Surface Design

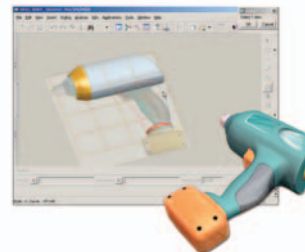

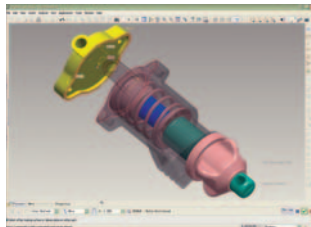

with purchase of Pro/ENGINEER Foundation XE Package

#### Imagine it. Design it. Deliver it – Fast!

For industrial designers, the pressure is on to find that highly stylized design that will ‘wow’ your customers. With the right surfacing and styling tools – fully integrated with your 3D CAD – you can stretch your imagination to new dimensions, and find that winning design in record time.

#### Save 40% on the Ultimate Design Solution

From now until September 30, when you purchase the Pro/ENGINEER Foundation XE Package – the gold standard in 3D CAD, you can save 40% on the fully integrated Pro/ENGINEER Interactive Surface Design (ISDX) for innovative, advanced free-form surfacing, resulting in the most aesthetic product designs.

#### Pro/ENGINEER Foundation XE – The Essential 3D CAD Package

With the Pro/ENGINEER Foundation XE Package, you get the most complete set of high-performance design tools in the industry. Here’s just a few of the capabilities:

- Develop complex surface geometry using sweeps, blends, extends, offsets
- Apply Warp technology to scale, stretch, bend and twist models
- Create precise geometry – regardless of model complexity

#### What You Can Do with Pro/ENGINEER ISDX:

- Build free-form geometry at any point in the design
- Focus on adding value to your design, not on transferring and interpreting data
- Quickly define and modify curves and surfaces, resulting in a faster ROI
- Full associativity allows surfaces and curves to instantly adapt to design changes

Discover why the world’s most productive and creative industrial designers rely on Pro/ENGINEER tools to stretch their imagination and bring their most stylish designs to life. To see a demo or request more information, visit [www.ptc.com/go/specialoffer](http://www.ptc.com/go/specialoffer)
